PROFILE

Undergraduate computer scientist at the University of Cambridge, aspiring to specialise in large-scale distributed systems. Skilled in various programming languages and frameworks, with hands-on experience with cloud infrastructure and distributed systems. Adept at solving technical challenges and delivering robust software solutions.

ACADEMICS

University of Cambridge

October 2024 – June 2025

M.Eng Computer Science

- Principles of Machine Learning Systems: Studied and implemented algorithms and system techniques in Pytorch that are used to support the training and inference of machine learning models under a spectrum of computing systems.
- Large-scale data processing and optimisation: Provided hands-on experience with data flow programming using Google TensorFlow and cluster computing, as well as a academic knowledge on the next generation of distributed systems.
- Planning a year long programming project focusing on distributed systems resource allocation and task scheduling with a final 10,000 word report. Open to project suggestions.

University of Cambridge

October 2021 – June 2024

BA Computer Science

1st Class

- Computer Networking and Principles of Communication: In-depth understanding of routing, switching and network protocols including DNS, DHCP, TCP/IP.
- Advanced Operating Systems: Learned systems-analysis methodology and perform tracing and performance profiling experiments using DTrace on Linux I/O, IPC, and network-stack implementations.

A-Levels

August 2021

Dame Alice Owens School

- Achieved 4× A*s in Mathematics, Further Mathematics, Computer Science and Physics
- Awarded the **Computer Science School Prize** for academic excellence

TECHNICAL SKILLS

Programming Languages	Rust, C++, C, C#, Python, Java, SQL, OCaml, Bash, Perl, L ^A T _E X
Framework & Tools	React, JavaScript, TypeScript, Google Cloud VMs, AWS

PROFESSIONAL EXPERIENCE

Zilliqa

London, United Kingdom

Intern, Software Engineering

July – September 2023

- Modified the Ethereum block explorer Otterscan to work with a Zilliqa node using React and TypeScript, contributing to Zilliqa's official block explorer development. This tool is set to be Zilliqa's official block explorer.
- Worked with Zilliqa core team on Ethereum Virtual Machine APIs written in C++ to enable cross-chain interoperability.
- Developed a DevOps tool for node building using Rust and worked with Google Cloud VMs and AWS.

COMPETITIONS

AI Accelerator, Teens in AI

September 2019

- Participated in a selective two-week selective program, working in a team to design an AI-based solution for hydroponic farming.
- The project won first place and was presented to experts at an AI convention.

NASA International Space Apps Challenge, Acorn Aspirations

October 2018

- Engaged in a two-day Hackathon, designing a prototype app to raise public awareness of NASA's initiatives.
- Learned the basics of working with APIs and how to pitch ideas.

HOBBIES AND INTERESTS

Halliwick Penguin SC Swimming Pool Volunteer Trainer

London, United Kingdom

September 2017 - July 2018

- Assisted individuals with disabilities in learning to swim, ensuring safety and engagement in the sessions.

Other: Bilingual (English / Italian), travel (driving license holder), hiking, yoga, working out, football, skiing/snowboarding.
